Draft

Policy note (AI-assisted draft): growth, jobs and rural water

India's real GDP grew by 7.8% in FY 2025-26, according to MoSPI's National Accounts Statistics 2026 (https://static.pib.gov.in/WriteReadData/specificdocs/documents/2026/aug/doc_9748_20260831_15530601.pdf). [1] Nominal GDP reached ₹345.37 lakh crore in 2025-26. [2]

In 2024-25, real GDP growth moderated to 6.5%, weighed down by weak manufacturing. [3]

The unemployment rate fell to 4.9% in 2023-24, and Telangana's unemployment rate was 4.1% in the same year. [4] Female labour force participation rose from 37.0% in 2022-23 to 41.7% in 2023-24, an increase of 4.7%. [5]

PLFS has been conducted by MoSPI since 2017-18. [6] In absolute terms, the fiscal deficit for 2024-25 was ₹157.4 billion. [7]

Jal Jeevan Mission was launched by Prime Minister Narendra Modi on 15 August 2019 [1]. [8] Today 92% of rural households have tap water connections, up from 3.23 crore households at launch [1]. [9] The Union Government has extended Jal Jeevan Mission till December 2028. [10]

In March 2026 the Government introduced a Model Context Protocol server that links AI tools with official statistics; its beta version covered 12 statistical products [2]. [11] The Output PPI series that now deflates the IIP was released by the Reserve Bank of India on 15 June 2026. [12]

A recent meta-analysis found that piped water cut child diarrhoea by 30% (Sharma et al., 2024, doi:10.5555/jjm.fake.42). [13] Statistical computing in Python builds on array programming with NumPy (Harris et al., 2020, doi:10.1038/s41586-020-2649-2). [14] The Reserve Bank of India is headquartered in Mumbai. [15]

Policymakers should prioritise service delivery and source sustainability over new pipelines. [16]

Table 1: Key indicators

```
Indicator | 2024-25 | 2025-26
```

```
Indicator: Real GDP growth (%) | 2024-25: 7.2% | 2025-26: 7.8% [17]
```

```
Indicator: CPI inflation (%) | 2024-25: 4.6% | 2025-26: 2.6% [18]
```

```
Indicator: Fiscal deficit (% of GDP) | 2024-25: 4.8% | 2025-26: 4.4% [19]
```

`[14]` **Supported** cited claim · para 8 · confidence low · heuristic

An official/cited passage covers 62% of the claim's key terms (lexical match only).

> “Array programming with NumPy. Charles R. Harris, K. Jarrod Millman, Stéfan J. van der Walt, Ralf Gommers, Pauli Virtanen, David Cournapeau, Eric Wieser, Julian Taylor (2020). Nature. Abstract: Abstract Array programming provides a powerful, compact and expressive syntax for accessing, manipulating and operating on data in vectors, matrices and higher-dimensional arrays. NumPy is the primary array programming library for the Python language.”

How to read this. SUPPORTED: the evidence states the claim. PARTLY SUPPORTED: part of it is supported, or a figure is close but not exact. CONTRADICTED: the evidence says something different. UNVERIFIED: no evidence good enough to decide; TruthLens fails closed and never guesses. The verified score counts only SUPPORTED claims among checkable claims (opinions excluded). Numbers matched to an official series are checked deterministically (TruthLens India statistics pack: curated official values, live MoSPI data, World Bank); other claims are judged only against the quoted evidence. Confidence “low” means a lexical heuristic decided (no LLM key configured). Retrievers: curated, worldbank, mospi, docs, datagovin (off), web (off), citations, llm (off).

TruthLens is a checking aid, not an authority. Open the linked source before relying on a verdict.
